👁 Introduction

Dear Educators,

Welcome to the Vis-CAT guide. This manual is designed to help you smoothly guide your students through the test. Please familiarise yourself with the steps below to ensure a successful testing session.

📝 Preparing for the test

Distributing QR codes

The QR code contains information for your allocated session. Please create a session in the teacher's portal, and generate and download the QR code. Then, guide the students to the "Accounts" page and use the "Scan" button to scan the QR code.

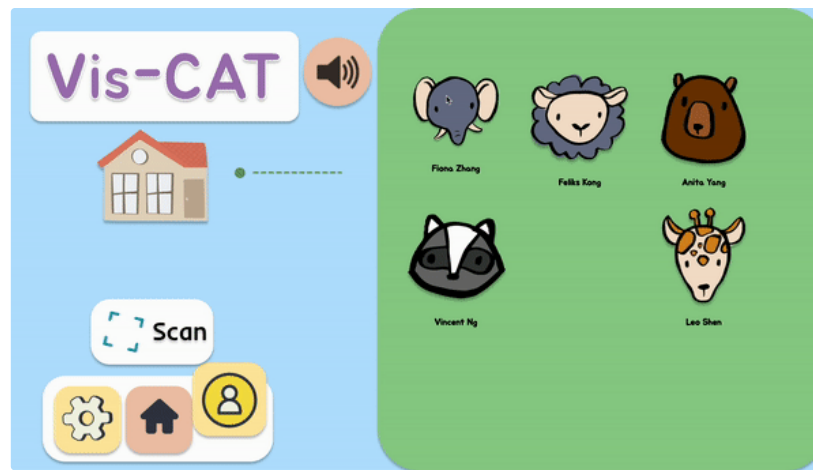

QR code example

Accounts → Scan

Guiding Students to Select Their Name

After students scan their QR codes, they'll be presented with a pop-out icon sheet containing a list of names. Ask students to find and select their own name from the sheet. Names can be re-selected pressing "selected" to deselect the current name.

Select Name

Taking the Test

Introducing the Tutorial to Students

Once the accounts are selected, navigate the student to Home page and start the test. Recommend students to watch the short tutorial at the beginning of the test. This will give them an overview of the task.

Tutorial

Drawing on Canvas

Guide students to connect the dots on the canvas to draw the pattern.

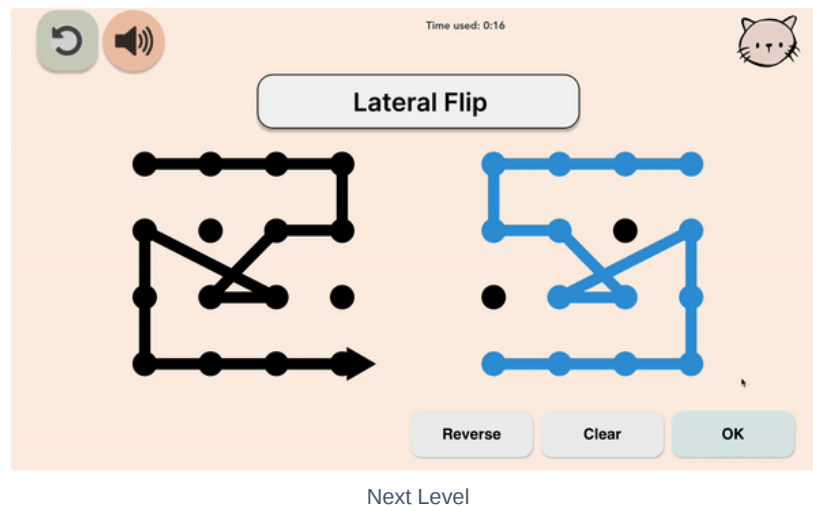

Here are several features that the students may use:

Complete the Test

Once the students finish the current level, direct them to click “OK”. Then, they will either be prompted to draw the pattern again or direct to the next level. There are a total of 3 levels.

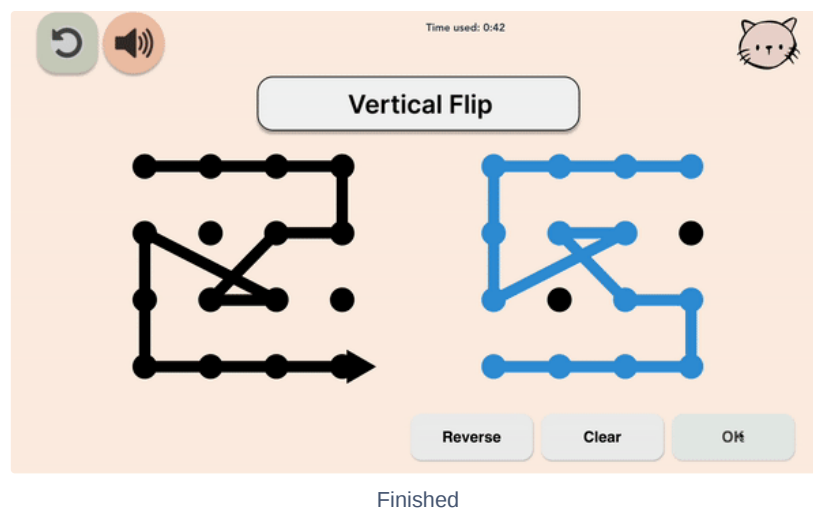

Post-test Procedures

Finish Page

Once the test is completed, the students will be directed to the Finish Page indicating the task completion. This page will show up either the student failed the current level or has completed all 3 levels.

Retrieving and Understanding Scores

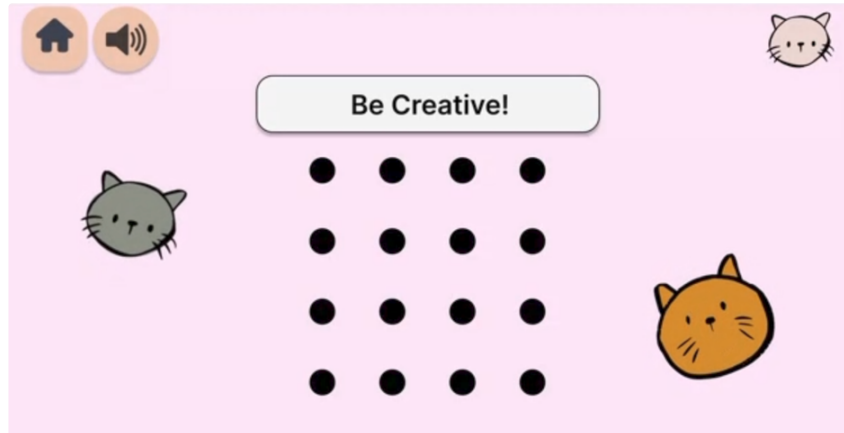

To access the students' scores, please go to the teacher's portal. The scores can be understood as below (however currently only total score is recorded):

	Each of Copy / Lateral Flip / Vertical flip	Total
Total Scores	0 - 2	Complete mode: 0 - 6 Partial mode: 0 - 2
Scores Explained	0: Students failed on both attempts 1: Students failed the first attempt, but succeeded the second attempt	

💡 Additional Features

Playground

Guide students to playground to familiar with the drawing canvas.

Playground

Challenge

There are some additional tests in the challenge page.
